[A Little History of the World](#) - E. H. Gombrich 2014-10-01

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Ranger Medic Handbook - U.S. Department of Defense 2016-01-19

Historically in warfare, the majority of all combat deaths have occurred prior to a casualty ever receiving advanced trauma management. The

execution of the Ranger mission profile in the Global War on Terrorism and our legacy tasks undoubtedly will increase the number of lethal wounds. Ranger leaders can significantly reduce the number of Rangers who die of wounds sustained in combat by simply targeting optimal medical capability in close proximity to the point of wounding. Directing casualty response management and evacuation is a Ranger leader task; ensuring technical medical competence is a Ranger Medic task. A solid foundation has been built for Ranger leaders and medics to be successful in managing casualties in a combat environment. The true success of the Ranger Medical Team will be defined by its ability to complete the mission and greatly reduce preventable combat death. Rangers value honor and reputation more than their lives, and as such will attempt to lay down their own lives in defense of their comrades. The Ranger Medic will do no less.

The Prepper's Medical Handbook - M. D. Forgey 2020-04-01

The basis of adequate prepping is being prepared for both common and dire events that may occur under the worst of all possible circumstances. These circumstances might include the breakdown in normal emergency support services (such as calling 911), the lack of an ability to obtain additional supplies, and the probability that you will not be able to rely on anyone but members of your immediate group or yourself. Prepping requires forethought with regard to food, water supplies, power, and

protection - all areas of significant technical preparation. Self-reliant medical care is no exception. This book provides the basis of prevention, identification, and long-term management of survivable medical conditions and can be performed with minimal training. It helps you identify sources of materials you will need and should stock-pile, it discusses storage issues, and directs you to sources for more complex procedures that require advanced concepts of field-expedient techniques used by trained medical persons such as surgeons, anesthesiologists, dentists, or midwives and obstetricians.

Combat Medic - S M Boney IV 2016-05-17

"A significant number of veterans suffer from Posttraumatic Stress Disorder-an issue that arises after exposed to distressing incidents or environments, in this case war. The term comes across as a bit nebulous for most of us when seeing it on the news, however, Samuel's account of PTSD helps to put things in perspective." - Seth Rose,

masculinebooks.com This is a true story of a soldier's journey through the Iraq war and his relentless battle with Post Traumatic Stress Disorder. Private Boney joined the U.S. Army in 2003. After basic and advanced medical training, he was deployed to Irtaq with the 1st Calvary Divisions 15th Forward Support Battalion in Operation Iraqi Freedom and Enduring Freedom. Follow along as he recalls his experience as a combat medic surviving mortar attacks, assisting casualties, and a gruesome gorilla warfare fight in the Wadi-Us-Salaam cemetery; the largest in the world.

Five Days at Memorial - Sheri Fink 2016-01-26

NEW YORK TIMES BESTSELLER • The award-winning book that

inspired an Apple Original series from Apple TV+ • A landmark investigation of patient deaths at a New Orleans hospital ravaged by Hurricane Katrina—and the suspenseful portrayal of the quest for truth and justice—from a Pulitzer Prize-winning physician and reporter “An amazing tale, as inexorable as a Greek tragedy and as gripping as a whodunit.”—Dallas Morning News After Hurricane Katrina struck and power failed, amid rising floodwaters and heat, exhausted staff at Memorial Medical Center designated certain patients last for rescue. Months later, a doctor and two nurses were arrested and accused of injecting some of those patients with life-ending drugs. Five Days at Memorial, the culmination of six years of reporting by Pulitzer Prize winner Sheri Fink, unspools the mystery, bringing us inside a hospital fighting for its life and into the most charged questions in health care: which patients should be prioritized, and can health care professionals ever be excused for hastening death? Transforming our understanding of human nature in crisis, Five Days at Memorial exposes the hidden dilemmas of end-of-life care and reveals how ill-prepared we are for large-scale disasters—and how we can do better. Ranger Medic Handbook - U S Department of Defense 2019-11-21

Historically in warfare, the majority of all combat deaths have occurred prior to a casualty ever receiving advanced trauma management. The execution of the Ranger mission profile in the Global War on Terrorism and our legacy tasks undoubtedly will increase the number of lethal wounds. Ranger leaders can significantly reduce the number of Rangers who die of wounds sustained in combat by simply targeting optimal medical capability in close proximity to the point of wounding. Survivability of the traumatized Ranger who sustains a wound in combat is in the hands of the first responding Ranger who puts a pressure dressing or tourniquet and controls the bleeding of his fallen comrade. Directing casualty response management and evacuation is a Ranger leader task; ensuring technical medical competence is a Ranger Medic task. A solid foundation has been built for Ranger leaders and medics to be successful in managing casualties in a combat environment. An integrated team response from non-medical personnel and medical providers must be in place to care for the wounded Ranger. The Ranger First Responder, Squad EMT, Ranger Medic Advanced Tactical Practitioner, and Ranger leaders, in essence, all Rangers must unite to provide medical care collectively, as a team, without sacrificing the flow and violence of the battle at hand. An integrated team approach to casualty response and care will directly translate to the reduction of the died of wounds rate of combat casualties and minimize the turbulence associated with these events in times of crisis. The true success of the Ranger Medical Team will be defined by its ability to complete the mission and greatly reduce preventable combat death. Rangers value honor and reputation more than their lives, and as such will attempt to lay down their own lives in defense of their comrades. The Ranger Medic will do no less. I will never leave a fallen comrade...

Integration of the Armed Forces, 1940-1965 - Morris J. MacGregor
2020-06-18

"In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when

other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy."_x000D_ Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.

Brothers in Arms - Geraint Jones 2019-05-16

Darkly funny, shockingly honest, Brothers in Arms is an unforgettable account of a soldier's tour of Afghanistan, the brutal reality of war - every scary, exciting moment - and the bonds of friendship that can never be destroyed. 'If you could choose which two limbs got blown off, what would you go for?' Danny said. 'Your arms or your legs?' In July 2009, Geraint (Gez) Jones was sitting in Camp Bastion, Afghanistan with the rest of The Firm - Danny, Jay, Toby and Jake, his four closest friends, all junior NCOs and combat-hardened infantrymen. Thanks to the mangled remains of a Jackal vehicle left tactlessly outside their tent, IEDs were never far from their mind. Within days they'd be on the ground in Musa Qala with the rest of 3 Platoon - a mixed bunch of men Gez would die for. As they fight furiously, are pushed to their limits, hemmed in by IEDs and hampered by the chain of command, Gez starts to wonder what is the point of it all. The bombs they uncover on patrol, on their stomachs brushing the sand away, are replaced the next day. Firefights are a momentary victory in a war they can see is unwinnable. Gez is a warrior - he wants more than this. But then death and injury start to take their toll on The Firm, leaving Gez with PTSD and a new battle just beginning. 'Jones writes of his brothers and their Afghan experience, from its adrenalin-filled highs to the many lows, with passion and candour.' - Major Adam Jowett, bestselling author of No Way Out 'A gritty, brutal book about men at war. Raw and real. Brilliant.' - Tom Marcus, author of Soldier Spy

Tactical Combat Casualty Care Handbook - United States Army
2017-05-17

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities
