Medical Imaging: Concepts, Methodologies, Tools, and Applications - Management Association, Information Resources 2016-07-18
Medical imaging has transformed the ways in which various conditions, injuries, and diseases

are identified, monitored, and treated. As various types of digital visual representations continue to advance and improve, new opportunities for their use in medical practice will likewise evolve. Medical Imaging: Concepts, Methodologies, Tools, and Applications presents a compendium of research on digital imaging

technologies in a variety of healthcare settings. This multi-volume work contains practical examples of implementation, emerging trends, case studies, and technological innovations essential for using imaging technologies for making medical decisions. This comprehensive publication is an essential resource for medical practitioners, digital imaging technologists, researchers, and medical students.

Visions and Concepts for Education 4.0 -

Michael E. Auer 2021-02-05

This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is

hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL

conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

Environmental Radioactivity and Emergency Preparedness - Mats Isaksson 2017-01-06
Radioactive sources such as nuclear power

installations can pose a great threat to both humans and our environment. How do we measure, model and regulate such threats? *Environmental Radioactivity and Emergency Preparedness* addresses these topical questions and aims to plug the gap in the lack of comprehensive literature in this field. The book explores how to deal with the threats posed by different radiological sources, including those that are lost or hidden, and the issues posed by the use of such sources. It presents measurement methods and approaches to model and quantify the extent of threat, and also presents strategies for emergency preparedness, such as strategies for first-responders and radiological triage in case an accident should happen. Containing the latest recommendations and procedures from bodies such as the IAEA, this book is an essential reference for both students and academicians studying radiation safety, as well as for radiation protection experts in public bodies or in the industry.

Research Anthology on Developing Effective Online Learning Courses - Management

Association, Information Resources 2020-12-18

In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a

few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on Developing Effective Online Learning Courses provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success.

Learning and Global Engagement - Deirdre Johnston 2022-07-13

Presents best practices for faculty and administrators developing globally-connected courses, including learning objectives, collaborative assignments, and logistical planning. As political instability, pandemic risks, rising costs, new requirements for experiential learning, and other factors make it increasingly difficult for students to study abroad, there is growing interest in globalizing and internationalizing the curricula of colleges and universities worldwide. The Wiley Handbook of Collaborative Online Learning and Global Engagement is designed to help educators develop and conduct high-impact, globally-connected courses across the humanities, the fine arts, and the social and natural sciences. This comprehensive guide covers collaborative practices, course design variables, student learning approaches, logistical planning, and more. An international team of contributors from

diverse geographic, cultural, and academic backgrounds offer insight into enhancing pedagogical practice, coordinating study abroad experiences, and promoting both students' and faculty's global competencies. Throughout the text, numerous real-world case studies, interactive and experiential assignments, sample syllabi, course bibliographies, and links to web and media resources reinforce best practices for course design, learning objectives, and pedagogy development. Based on a detailed assessment of 500 students in collaborative courses across 14 countries, this innovative guide: Covers co-development of learning objectives across different courses, disciplines and cultural contexts, co-ordination of course content, technology, and resources, and intercultural learning assessment. Explores new and innovative ways to engage students in distant locations in collaborative learning. Provides advice for overcoming logistical challenges, managing group dynamics,

controlling costs, and implementing connected courses with limited resources Discusses the impact globally-connected courses have on cultural curiosity, knowledge, strategy, and behavior Offers approaches for addressing cultural transgressions and miscommunication, and for collaborating with other faculty members across cultures and educational systems Featuring multiple cultural perspectives and international contexts, *The Wiley Handbook of Collaborative Online Learning and Global Engagement* is a valuable guide and reference for faculty and administrators involved in teaching, planning, implementing, or assessing courses with global learning outcomes.

Item Banking: Interactive Testing and Self-Assessment - Dieudonne A. Leclercq 2012-12-06

Assessment has long been recognized as a key feature in learning efficacy, especially through formative evaluation. Item banking, the storage and classification of test items, is an essential part of systematic assessment. This volume is based on a NATO Advanced Research Workshop held as part of the Special Programme on Advanced Educational Technology. The workshop brought together scholars from around the world to discuss and critically analyze the issues and problems associated with Subjective Probability Measurement (SPM) or the more generic research area called self-assessment. Recent advances in computer technology (expert systems, interactive video disks, and hypermedia) along with the developing sophistication of self-assessment

scoring systems based on SPM made this conference particularly important and timely. The book is divided into three main parts: - The input: item banking and hypermedia - The process: subjective probabilities - The output: teaching and learning feedbacks. In summary, although SPM is a difficult theoretical concept for most educators to comprehend, the sophisticated nature of modern computer systems coupled with comprehensive formative and summative evaluation and self-assessment systems make SPM transparent to the user.

Workshop Proceedings of the 11th International Conference on Intelligent Environments - D.

Preuveneers 2015-07-06

With emerging trends such as the Internet of Things, sensors and actuators are now deployed and connected everywhere to gather information and solve problems, and such systems are expected to be trustworthy, dependable and reliable under all circumstances. But developing intelligent environments which have a degree of common sense is proving to be exceedingly complicated, and we are probably still more than a decade away from sophisticated networked systems which exhibit human-like thought and intelligent behavior. This book presents the proceedings of four workshops and symposia: the 4th International Workshop on Smart Offices and Other Workplaces (SOOW'15); the 4th International Workshop on the Reliability of

Intelligent Environments (WoRIE'15); the Symposium on Future Intelligent Educational Environments and Learning 2015 (SOFIEE'15); and the 1st Immersive Learning Research Network Conference (iLRN'15). These formed part of the 11th International Conference on Intelligent Environments, held in Prague, Czech Republic, in July 2015, which focused on the development of advanced, reliable intelligent environments, as well as newly emerging and rapidly evolving topics. This overview of and insight into the latest developments of active researchers in the field will be of interest to all those who follow developments in the world of intelligent environments.

Advances in Human Factors and Systems

Interaction - Isabel L. Nunes 2020-06-30

This book presents cutting-edge research on innovative system interfaces, highlighting both lifecycle development and human-technology

interaction, especially in virtual, augmented and mixed reality systems. It describes advanced methodologies and tools for evaluating and improving interface usability, and discusses new models, case studies and good practices. The book addresses the human, hardware, and software factors in the process of developing interfaces for optimizing total system performance, while minimizing costs. It also highlights the forces currently shaping the nature of computing and systems, such as the importance of portability and technologies for reducing power requirements; the need for better assimilation of computation in the environment; and solutions to promote computer and system accessibility for people with special needs. Based on the AHFE 2020 Virtual Conference on Human Factors and Systems Interaction, held on July 16-20, 2020, the book offers a timely survey and a practice-oriented guide for systems interface users and developers alike.

Learning Environment and Design - Will W.K.
Ma 2020-11-07

This special edition of the Educational Communications and Technology Yearbook Series bears a title of "Learning Environment and Design: Current and Future Impact". It provides a timely forum to share theoretical and practical insights in both the local and international contexts in response to the fact that new media and technologies have infiltrated and shaped the learning environments from mere physical spaces into multifaceted possibilities, impacting the ways individuals teach and learn. Designs of learning environments to harness technologies appropriately to engage learners better, as well as the roles of learners and educators play in this changing learning environment, are examples of important global issues in the discourse of the contemporary educational developments. Having gathered a diverse collection of research papers written by scholars

and practitioners in the fields of education, communication and humanities across Asia, Australasia, Europe and the United States, this book gives readers a cross-cultural background on the developments of technological designs and educational practices, investigating areas in redefining of quality education; online learning and blended learning; new media in education; gamification, AI, and innovative learning technologies. Aimed to catalyze knowledge exchanges and provide fresh views on interdisciplinary research, the book sheds light on how emerging technologies can be adapted in the fields of education and communication, so as to facilitate the current and future designs of learning environments to improve learners' performances.
