Accreditación laboratorio clínico - David Burnett 1998

El objetivo de este libro es doble; en primer lugar, introducir el tema de sistemas de la calidad y de acreditación en el laboratorio clínico empleando materiales de diferentes sistemas, y en segundo lugar, proporcionar una fuente de información práctica para ayudar a los laboratorios a prepararse para la acreditación. Durante la preparación quedó claro que aún en países donde el inglés es la lengua más importante, las definiciones de términos de uso común en el laboratorio, como control de la calidad, varían ampliamente y por tanto se ha tenido sumo cuidado en definir los términos utilizados y en suministrar la procedencia de la bibliografía.

Handbook of Quality Assurance in Laboratory Medicine - Shubangi Tambwekar 2015-01-01

Quality Assurance (QA) is an integral and very important part of laboratory medicine.

Pathologists, microbiologists, biochemists and laboratory technicians all need to be proficient in this subject. QA is also mandatory for obtaining accreditation, which ensures a certain level of quality in services being provided. The subject of Quality Assurance (QA), though not new, is a relatively neglected entity and is looked at with some degree of apprehension.

This book is addressed to those entrusted with implementing Quality Assurance (QA) in laboratory medicine; generally, these are persons with basic training as pathologists. This handbook is meant as a beginner and handy guide to Quality Assurance; all the basics of Quality Assurance have been incorporated to encourage the beginner to make a start.

Wireless Multimedia - James P. K. Gilb
2004-03

Wireless Multimedia: A Handbook to the IEEE 802.15.3 Standard clarifies the IEEE 802.15.3 standard for individuals who are implementing compliant devices and shows how the standard can be used to develop wireless multimedia applications. The 802.15.3 standard addresses an untapped market that does beyond 802.11 and Bluetooth wireless technologies. The standard addresses the consumer need for low-cost, high data-rate, ad-hoc wireless connections. Some of these applications include: wireless keyboards and printers, personal video and digital cameras, cordless telephones and intercoms, digital audio players and headphones, gaming (including interactive gaming, multiplayer consoles, handheld multiplayer gaming, digital music, video, and image uploads to handheld games), home theater system and stereo system components, video conferencing, and more! Navigating through the IEEE

802.15.3 standard to find the required information can be a difficult task for anyone who has not spent a considerable amount of time involved in standards development within the IEEE 802.15.3 Working Group. Written by Dr. James Gilb, Technical Editor of the IEEE 802.15.3 Standard, Wireless Multimedia contains an "insider's view" of the standard in which implementation issues that are not obvious in the text of the standard are highlighted with in-depth explanations. Impact the future of your business Wireless Multimedia: A Handbook to the IEEE 802.15.3 Standard brings it all together for those looking to standardize their wireless applications. It introduces and eases the implementation of devices compliant to the IEEE 802.15.3 standard. You will discover the types of implementations that were anticipated when the standard was developed, which will help you to determine what architectures are ideal for developing IEEE 802.15.3 products.

New Developments in Distributed Applications and Interoperable Systems - Zielinski
2006-04-11

Distributed applications are a necessity in most central application sectors of the contemporary information society, including e-commerce, e-banking, e-learning, e-health, telecommunication and transportation. This results from a tremendous growth of the role that the Internet plays in business, administration and our everyday activities. This trend is going to be even further expanded in the context of advances in broadband wireless communication. New Developments in Distributed Applications and Interoperable Systems focuses on the techniques available or under development with the goal to ease the burden of constructing reliable and maintainable interoperable information systems providing services in the global communicating environment. The topics covered in this book include: Context-aware applications; Integration and interoperability of distributed systems; Software architectures and services for open distributed systems; Management, security and quality of service issues in distributed systems; Software agents

and mobility; Internet and other related problem areas. The book contains the proceedings of the Third International Working Conference on Distributed Applications and Interoperable Systems (DAIS'2001), which was held in September 2001 in Kraków, Poland, and sponsored by the International Federation on Information Processing (IFIP). The conference program presents the state of the art in research concerning distributed and interoperable systems. This is a topical research area where much activity is currently in progress. Interesting new aspects and innovative contributions are still arising regularly. The DAIS series of conferences is one of the main international forums where these important findings are reported.
