

The Oryx Resource Guide To El Nino And La Nina

When people should go to the book stores, search establishment by shop, shelf by shelf, it is really problematic. This is why we give the ebook compilations in this website. It will utterly ease you to look guide **The Oryx Resource Guide To El Nino And La Nina** as you such as.

By searching the title, publisher, or authors of guide you essentially want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections. If you point to download and install the The Oryx Resource Guide To El Nino And La Nina , it is unconditionally easy then, back currently we extend the associate to purchase and make bargains to download and install The Oryx Resource Guide To El Nino And La Nina appropriately simple!

Tropical Forest Remnants - William F. Laurance 1997-06-21

We live in an increasingly fragmented world, with islands of natural habitat cast adrift in a sea of cleared, burned, logged, polluted, and otherwise altered lands. Nowhere are fragmentation and its devastating effects more evident than in the tropical forests. By the year 2000, more than half of these forests will have been cut, causing increased soil erosion, watershed destabilization, climate degradation, and extinction of as many as 600,000 species. Tropical Forest Remnants provides the best information available to help us understand, manage, and conserve the remaining fragments. Covering geographic areas from Southeast Asia and Australia to Madagascar and the New World, this volume summarizes what is known about the ecology, management, restoration, socioeconomics, and conservation of fragmented forests. Thirty-three papers present results of recent research as well as updates from decades-long projects in progress. Two final chapters synthesize the state of research on tropical forest fragmentation and identify key priorities for future work.

Life After Logging - E. Meijaard 2005-01-01

This book presents a technical review of ecological and life history

information on a range of Bornean wildlife species, aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts. It addresses three audiences: 1) those involved in assessing and regulating timber harvesting activities in Southeast Asia, 2) those involved in trying to achieve conservation goals in the region, and 3) those undertaking research to improve multipurpose forest management. This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices. The recommendations can also be valuable to the many governmental and non-governmental organisations promoting sustainable forest management and eco-labelling. Finally, it identifies a number of shortcomings and gaps in knowledge, which the hope can interest the scientific community and promote further research. This review is, an important scientific step toward understanding and improving sustainable forestry practices for long-term biodiversity conservation. Even in the short term, however, significant improvements can be made to improve both conservation and the efficiency of forest management, and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented, and that further research will

continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.

A Climatoarchaeological Study of Uruk - Marc Andrew Beherec 2004

The Environment Index - 1987

El Niño - A. M. Babkina 2003

The term El Niño (Spanish for "the Christ Child") was originally used by fishermen along the coasts of Ecuador and Peru to refer to a warm ocean current that typically appears around Christmastime and lasts for several months. Fish are less abundant during these warm intervals, yet in some years, however, the water is especially warm and the break in the fishing season persists into May or even June. El Niño also brings heavy rains. During the past 40 years, nine El Niños have affected the South American coast. Most of them raised water temperatures not only along the coast, but also at the Galapagos islands and in a belt stretching 5000 miles across the equatorial Pacific. The weaker events raised sea temperatures only by one to two degrees Fahrenheit, but the strong ones, like the El Niño of 1982-83, left an imprint, not only upon the local weather and marine life, but also on climatic conditions around the globe. This book includes a detailed overview and bibliography with complete title, author and subject indexes.

Library Media Connection - 1999

Encyclopedia of Cryptology - David E. Newton 1998

Cryptology, the science of codes and ciphers, has a long history. Although cryptology is usually thought of in relation to spies and intelligence operations, today this discipline is part of our everyday lives, encompassing even the most sophisticated communications technology.

Forthcoming Books - Rose Arny 2002

Bowker's Best Reference Books: Author index. Title index - 2005

Contains approximately 20,000 mostly English language sources for

academic libraries of all sizes.

Tending Animals in the Global Village - David M. Sherman
2007-11-27

A book like no other in the field of veterinary medicine with pertinent information every student and practitioner will find beneficial. Veterinarians have access to a great variety of texts, journals, and continuing education opportunities to keep them on top of the tremendous technological advances in clinical care and preventive medicine. Outside of the technical realm, however, there are many global trends, which exert profound effects on how the veterinary profession serves society and how veterinary professionals define their role in a rapidly changing world. This new and unrivaled book delves into these influences in impressive detail, identifying new challenges and opportunities for the veterinary profession in a global context. Unique topics covered include: The important global trends with implications for veterinary medicine. Different cultural attitudes towards the human use of animals, their impact on the human-animal relationship, and the challenges this poses for veterinarians. The role of livestock in food security, rural development, and sustainable agriculture and the opportunities for veterinarians to improve the lives of people who depend on animals around the world. The relationship of global environmental change to animal health and production. The emerging field of conservation medicine and the important role of veterinarians in protecting biodiversity and conserving wildlife. A global perspective on veterinary service delivery and the opportunities and challenges for improving animal health care worldwide. The growth of international trade, its relation to food safety and animal health, and its impact on animal agricultural and veterinary medicine. The growing risk of foreign animal disease, the national and international institutions involved in animal disease control, and the role of the private practitioner in controlling foreign animal disease. Nontraditional career paths for veterinarians interested in working internationally and how to identify and prepare for such international career opportunities.

Current Index to Journals in Education - 1994

Recommended Reference Books for Small and Medium-sized Libraries and Media Centers, 2001 - Bohdan S. Wynar 2001

An annotated bibliography listing general reference works as well as those on social sciences, humanities, and science and technology

Resources in Education - 1997

Notable Natural Disasters: Events 1970 to 2006, indexes - Marlene Bradford 2007

Scientific and historical overviews of natural disasters followed by a chronological survey of the worst or most notable disasters in history, including such recent events as the 2004 tsunami and Hurricane Katrina.

Ethnoprimateology - Kerry M. Dore 2017-02-23

Ethnoprimateology, the combining of primate and anthropological practice and the viewing of humans and other primates as living in integrated and shared ecological and social spaces, has become an increasingly popular approach to primate studies in the twenty-first century. Offering an insight into the investigation and documentation of human-nonhuman primate relations in the Anthropocene, this book guides the reader through the preparation, design, implementation, and analysis of an ethnoprimateological research project, offering practical examples of the vast array of methods and techniques at chapter level. With contributions from the world's leading experts in the field, Ethnoprimateology critically analyses current primate conservation efforts, outlines their major research questions, theoretical bases and methods, and tackles the challenges and complexities involved in mixed-methods research. Documenting the spectrum of current research in the field, it is an ideal volume for students and researchers in ethnoprimateology, primateology, anthropology, and conservation biology.

Book Review Index - 2004

Every 3rd issue is a quarterly cumulation.

The ENSO Signal - 2001

Books in Print - 1995

The British National Bibliography - Arthur James Wells 2002

ENSO Signal Network Newsletter - 2003

Información de salud para los consumidores - Alan M. Rees 1998
Anthologizes more than 150 consumer health brochures and pamphlets available in Spanish, as originally published by federal and professional health agencies such as the National Cancer Institute, the Food and Drug Administration, and the Leukemia Society of America. Entries are organized by topic, with the preface text and chapter titles printed in English as well. Also contains an appendix of suggested sources for additional information, and indices of document titles, sources, and subjects. Annotation copyrighted by Book News, Inc., Portland, OR
American Reference Books Annual - Bohdan S. Wynar 2003
1970- issued in 2 vols.: v. 1, General reference, social sciences, history, economics, business; v. 2, Fine arts, humanities, science and engineering.

National Union Catalog -

Includes entries for maps and atlases.

A Change in the Weather - Tim Sherratt 2005

Climate plays a considerable role in the society and culture of Australia. This text is an interdisciplinary 'weather report' that draws together perspectives from the social sciences, the humanities, science and engineering to deepen our understanding of the relationship between climate and culture in Australia.

Hispanic-deaf Newsletter - 1986

Climate Savvy - Lara J. Hansen 2011

Climate change demands a change in how we envision, prioritize, and implement conservation and management of natural resources.

Addressing threats posed by climate change cannot be simply an afterthought or an addendum, but must be integrated into the very framework of how we conceive of and conduct conservation and management. In *Climate Savvy*, climate change experts Lara Hansen and

Jennifer Hoffman offer 18 chapters that consider the implications of climate change for key resource management issues of our time—invasive species, corridors and connectivity, ecological restoration, pollution, and many others. How will strategies need to change to facilitate adaptation to a new climate regime? What steps can we take to promote resilience? Based on collaboration with a wide range of scientists, conservation leaders, and practitioners, the authors present general ideas as well as practical steps and strategies that can help cope with this new reality. While climate change poses real threats, it also provides a chance for creative new thinking. Climate Savvy offers a wide-ranging exploration of how scientists, managers, and policymakers can use the challenge of climate change as an opportunity to build a more holistic and effective philosophy that embraces the inherent uncertainty and variability of the natural world to work toward a more robust future.

Boletín Internacional de Bibliografie Sobre Educação - 1985

Consumer Health Information Source Book - Alan M. Rees 2000

How can an award-winning source book that helps consumers find health information be improved? Health expert Alan Rees has done just that in his sixth edition by providing practical advice on using the Internet, tips on where to find Spanish-language health pamphlets, and recommendations on what's most important in the world of alternative medicine. The sixty edition provides users with an annotated guide to health-related resources--hotlines, newsletters, pamphlets, Web sites, CD-ROMS, magazines, books, and more! Readers are given a description on each resource and how to best use it.

Penguin Conservation - 1999

El-Hi Textbooks and Serials in Print - 1985

The Oryx Resource Guide to El Niño and La Niña - Joseph S. D'Aleo 2002

Explains to general readers the fundamentals of the now infamous Tropical Pacific siblings that two decades ago were an obscure

phenomenon affecting weather in a few islands far away.

Reference Books Bulletin - 1997

The Oryx Guide to Natural History - Patricia L. Barnes-Svarney 1999

Covers thirty natural history topics, arranged alphabetically from "amphibians" to "volcanoes," with each entry containing an introduction, timeline, examination of early and modern developments, and glossary of terms.

Notable Natural Disasters: Overviews - Marlene Bradford 2007

Scientific and historical overviews of natural disasters followed by a chronological survey of the worst or most notable disasters in history, including such recent events as the 2004 tsunami and Hurricane Katrina.

Wildlife in a Changing Climate - Edgar Kaeslin 2012

Major climate-induced changes -- Consequences of climate change -- Measures for adaptation to climate change -- Conclusions -- References.
Knowledge Discovery from Sensor Data - Mohamed Medhat Gaber 2010-04-07

This book contains thoroughly refereed extended papers from the Second International Workshop on Knowledge Discovery from Sensor Data, Sensor-KDD 2008, held in Las Vegas, NV, USA, in August 2008. The 12 revised papers presented together with an invited paper were carefully reviewed and selected from numerous submissions. The papers feature important aspects of knowledge discovery from sensor data, e.g., data mining for diagnostic debugging; incremental histogram distribution for change detection; situation-aware adaptive visualization; WiFi mining; mobile sensor data mining; incremental anomaly detection; and spatiotemporal neighborhood discovery for sensor data.

Index to American Reference Books Annual - 2000

Tigers of the World - Ronald Tilson 2009-11-30

The second edition of *Tigers of the World* explores tiger biology, ecology, conservation, management, and the science and technology that make this possible. In 1988, when the first edition was published, tiger conservation was still in its infancy, and two decades later there has

been a revolution not only in what is known, but how information about tigers is obtained and disseminated. In the fast changing world of conservation, there is a great need to summarize the vast and current state-of-the-art, to put this into historical perspective, and to speculate in what yet remains to be done. *Tigers of the World, 2e* fulfills this need by bringing together in a unique way the world's leading tiger experts into one volume. Despite the challenges ahead, there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists, conservation biologists, wildlife managers, natural resource policymakers, and most importantly the caring public. *Examines the

past twenty years of research from the world's leading tiger experts on biology, politics, and conservation. *Describes latest methods used to disseminate and obtain information needed for conservation and care of this species. *Includes coverage on genetics and ecology, policy, poaching and trade, captive breeding and farming, and the status of Asia's last wild tigers. *Excellent resource for grad courses in conservation biology, wildlife management, and veterinary programs. *New volume continues the classic Noyes Series in Animal Behavior, Ecology, Conservation and Management.
