Central Heating - George Steele 2013-10-22

Central Heating: A Design and Installation Manual is a guide to modern domestic heating systems for those involved in the trade. The book discusses the benefits of heating systems, the effects of heating, the effect of insulation on comfort and cost, and the process of heat and moisture transfer. The text also describes the concepts, possibilities, and prevention of condensation; the basic heating system; and

circuit hydraulics and variation. The chemical effect of water, the selection of hardware (i.e. gas-, oil-, and solid-fuel boilers; emitters; and cylinders), temperature control, and the design of a heating system are also considered. The book tackles the relationship between boiler size, system size, capital cost and running costs, as well as the installation of heating systems. The text will be invaluable to students taking up central heating installation

related courses, householders considering installing central heating, and electricians.

Handbook of Laboratory Animal Management and Welfare - Sarah Wolfensohn 2013-01-03

This bestseller has been an essential book for all those working with laboratory animals since it was first published in 1994. This fourth edition retains all the classic features that have made it a must-have reference including emphasis on best practice in order to improve animal welfare. The contents have been thoroughly updated and reorganised to make sure it is a really practical book for day-to-day use in the laboratory. The first section of the book covers principles applicable to all species, for example

by guest

husbandry, handling and the education and training required by scientists and technical staff working with animals in the laboratory. Later chapters focus on specific species or groups of species. New to this edition:

- Reflects changes in European legislation and their impact on national legislation
- Covers recommendations for the education and training of those carrying out animal experiments across Europe
- New chapters on ethical considerations and balancing animal welfare with science
- New information on environmental enrichment for laboratory animals
- Covers advancements in anaesthesia and analgesia and techniques

Spiral bound for ease-of-use as a bench-top reference. This book is ideal for all personnel carrying out scientific procedures using animals, particularly during training and also for the new researcher. It will also be essential reading for study directors designing research programmes, animal

technicians and veterinarians working with laboratory animal species.

**Building A People's Curriculum** - David Clanfield 1989-01-01

This volume introduces a Quebec teachers' collective, La maîtresse d'école, recounting their history and presenting a sampler of their pedagogical writings. This book highlights the collective's seamless movement back and forth between theory and practice. It combines a lucid socialist critique of the education system in Quebec with the most concrete illustrations imaginable of an alternative practice for the everyday teacher. At the same time, it offers an education policy designed to accelerate
